ABOUT MABDESIGN

MabDesign, the French association of the Biotherapy Industry

MabDesign, the French biotherapy industrial association, aims to support, federate and increase the visibility of the biopharmaceutical industry, foster exchanges, promote the development and competitiveness of companies, and stimulate innovation by encouraging the emergence of start-ups from academic research.

In order to carry out its development strategy and to adapt to changes in the industrial ecosystem, MabDesign's governance has evolved to meet the specific needs of the various companies working in the biotherapy industrial sector. Therefore, the board of directors of MabDesign already composed of DBV Technologies, Lyonbiopole, Pierre Fabre and Sanofi, has been considerably strengthened with the arrival of ABL Europe, bioMérieux, Institut Pasteur, Thermo Fisher Scientific and TreeFrog Therapeutics as well as three qualified persons with Nicola Beltramineli (Innate Pharma), Hervé Broly (Merck) and Stéphane Legastelois (33 California). Their arrival to the board of directors reinforces MabDesign global vision of the current challenges and opportunities of the biopharmaceutical industry.

Moreover, to achieve its goals MabDesign sets up a coherent set of actions promoting exchanges, collaborations and skills development. In this dynamic MabDesign has developed a **national directory** that brings together industrial and academic players in biotherapy and allows to identify online the know-how available in France. MabDesign organizes high-level **international scientific events**, in collaboration with key ecosystem players, to highlight innovation and stimulate exchanges between companies in the sector. With the help of its scientific committee (COSSF), MabDesign writes **summary reports** (ImmunoWatch) for the biotherapy industry. MabDesign offers specialized and innovative **continuous professional training solutions** to enable companies to adapt their skills to the market evolution and maintain their competitiveness. Finally, MabDesign offers its members a **wide range of services** to help companies of all sizes to optimize their positioning, protect and enhance their innovations, conquer new markets and raise public funds.

Operational since September 2015, MabDesign currently has over **300 members companies** and its diversity is its strength. MabDesign's dynamic network includes pharmaceutical and biotech companies, service providers (eg. CROs, CDMOs, etc), professional training actors, high-tech equipment suppliers and specialized consultants.

ANTIBODY INDUSTRIAL SYMPOSIUM

12th edition - Montpellier, France

www.aiscongress.com

20-21 June 2024

Contact

Ana ANTUNES

✉ ana-sofia.antunes@mabdesign.fr

☎ +33 (0)6 26.33.63.21

The AIS covers the hot topics in antibody, protein recombinants and CART cells from research and development and entering in clinical trials. This new edition will take place over 2 days in Montpellier and will combine several high-level plenary conferences, an exhibition hall, a pitch session for innovative projects/technologies as well as a poster session for start-up projects, in addition to a B2B meeting platform to maximize the creation of partnerships.

PROGRAM

● SCIENTIFIC TALKS

Listen to the latest developments at the plenary sessions given by leading experts

● EXHIBITION HALL

Learn about the most recent innovations to advance and accelerate the field of antibodies

● BREAKTHROUGH INNOVATION SESSION

Discover the new innovations, projects and technologies during short presentations

● B2B MEETINGS

Meet and connect with new clients and generate new leads during B2B meetings

IMMUNOTHERAPIES & INNOVATIONS FOR INFECTIOUS DISEASES

8th edition - Lyon, France

www.i4id.org

The purpose of these two-day congress is to foster interactions between pharmaceutical industries, research laboratories, service providers, technology developers, and clinicians and therefore contribute to the development of innovative therapies against infectious diseases with multidisciplinary approaches.

The program of I4ID2024 will include keynote lectures, plenary sessions and industrial talks covering the latest developments and highest innovative projects in the field. Furthermore, it will be possible to set up, through an online platform, business meetings during both days (partnering).
