

HIGHLIGHT

chemometec

Who are you?

ChemoMetec is a worldwide leading manufacturer of cell counting and analysis equipment. We specialize in developing and producing high-precision instrumentation, delivering consistent data for thousands of customers across biotech, pharma and academic segments.

What is your expertise?

The **NucleoCounter®** and **XcytoMatic®** instruments are automated cell counters used to determine the cell count and viability of various types of cells like mammalian, insect, avian cells, and yeast. They utilize a unique technology platform based on a combination of image cytometry and advanced image analysis to ensure precise and consistent results.

What are your key products?

The **NucleoCounter®** NC-202™, our cassette-based instrument features upgraded hardware and new NC-View™ software minimizing variation.

We designed the XM40™ to support cGMP manufacturing of biologics, vaccines, and advanced therapies, allowing for 100 samples to be analyzed per hour.

Our products offer the most precise cell counts on the market.

Can you sum up your company in 3 words?

- Accurate
- Precise
- Consistent
