

HIGHLIGHT

Who are you?

PD-value provides modeling & simulation services for pharmaceutical clients, using pharmacometrics and systems biology approaches. Our modelers with diverse backgrounds offer support for smarter drug development of small molecules, antibodies, and new modalities.

What is your expertise?

We create value for our clients, by integrating biological and clinical data over time, biomarkers, species and clinical endpoints. PD-value, by focusing on our clients' need, supports their drug development programs and take their projects to the next milestone in the diverse therapeutic fields and modalities.

What are your key products or services?

We provide purpose-built and state-of-the-art modeling services in pharmacokinetic-pharmacodynamic (PK-PD), physiology-based PK (PBPK), quantitative systems pharmacology (QSP) and systems biology covering the fields of oncology, neuroscience, immunology, metabolic diseases, cardiovascular, and more.

Can you sum up your company in 3 words?

- Modeling & Simulation
- Translational
- Drug development
