

# HIGHLIGHT

Kimialys ▶

# Who are you?

**Kimialys** is a French industrial company specializing in innovative biosensing. Specifically, we support diagnostic and pharmaceutical companies with their in-vitro analyses, enabling cutting-edge biomolecule detection and characterization.

# What is your expertise?

**Kimialys** has developed and patented K-One®, an advanced surface chemistry that serves as the technological platform for all our solutions. By leveraging our technology and our expertise in ligand functionalization, rapid test development, and biosensors, we enhance key assay parameters, such as sensitivity, specificity, selectivity, and reproducibility, as well as cost-effectiveness.

# What are your key products or services?

## **Our solutions for pharma companies:**

- ▶ SPR screening & characterization services
- ▶ Sensor-chip supply for SPR instruments
- ▶ Companion Diagnostics development
- ▶ Biomolecule extraction/depletion

**Contact us for more info.**

# What are your key products or services?

## **Our solutions for diagnostic companies:**

- ▶ Development support for LFAs, PCR, iPCR, LAMP tests
- ▶ Chip supply for biosensing instruments
- ▶ Fast and efficient antibody screening
- ▶ Optimized gold bioconjugate supply

**Contact us for more info.**

# Can you sum up your company in 3 words?

- K-One<sup>®</sup>
- Biosensing
- Performance
