

# HIGHLIGHT

# Who are you?

GLYcoDiag specialize in glycosciences and microbiology products and services. We help industrial clients since 2005 to boost innovation and rapid ingredient development for human and animal health, cosmetics, nutraceuticals and environment.

# What is your expertise?

GLYcoDiag is a team of experts in glycosciences and microbiology. We develop innovative diagnostic tools and glycoanalysis methods. Our expertise in microbiology helps to assess the effect of products on microorganisms growth, death, adhesion and their communication with cells.

# What are your key products or services?

GLYcoDiag offers glycosciences reagents (LectPROFILE®) and services (GLYcoPROFILE®) based on glycans interaction studies. Our microbiology services include, microbiota co-culture systems, design of new systems preservatives, antimicrobial activities and prebiotic properties.

# Can you sum up your company in 3 words?

- Expertise
- customer-oriented
- Innovative
