

# HIGHLIGHT

**iRNAlead<sup>®</sup>**

# Who are you?

**RNAlead** is committed to providing pharma, biotech or academic research teams with access to its unique and proprietary RNA delivery technology: **FlashRNA®**.

We support our clients throughout their innovation journey, from early-stage research to clinical applications.

# What is your expertise?

**FlashRNA®** is an advanced RNA delivery technology, enabling efficient, safe, and versatile RNA transfer, for gene therapy, genome editing, cell reprogramming, mRNA vaccines, and regenerative medicine. It offers unrivalled performance and safety for multiple RNA delivery, in vitro, in vivo and it's ready for therapy, thanks to a validated GMP scale-up.

# What are your key products or services?

**RNAlead** provides its RNA delivery technology platform in a customized, end-to-end solution that includes design, small-scale production, manufacturing tech transfer, and licensing solutions. Efficient, accessible, and clinic-ready: **FlashRNA®** sets a new standard for safer, targeted RNA-based therapeutics.

# Can you sum up your company in 3 words?

- RNA delivery
- Biotherapy
- Expertise
