

HIGHLIGHT

cliniSciences

Who are you?

CliniSciences is a European provider of products and services for research and diagnostics. Here we highlight our peptide, **protein and antibody Chemical Synthesis** service (GMP).

What is your expertise?

CliniSciences expertise lies in chemical protein synthesis, enabling the production of complex therapeutic, diagnostic and vaccine proteins (R&D and GMP). We specialize in challenging sequences, precise modifications, and endotoxin-free, high-purity molecules that overcome the limits of biological expression.

What are your key products or services?

CliniSciences provides chemical synthesis of biologics from design to GMP production. Ideal for modified (non-canonical aa, PEG, drug conjugates...) or hard-to-produce proteins (hydrophobic, toxic...), we deliver high-purity, biologically active biomolecules.

Can you sum up your company in 3 words?

- Expertise
- Innovation
- Reliability
