

HIGHLIGHT

SMALTIS

Who are you?

Smaltis — more than a laboratory, a partner for mastering and innovating in microbiology.

We are a private laboratory specializing in **microbiology**, delivering **advanced and tailor-made solutions** to research projects and the performance of products, with honest and insightful scientific guidance.

What is your expertise?

Our expertise spans the fields of **antimicrobials, microbiota, bioproduction,** and **genomics**.

We thus work for projects linked to antimicrobial resistance, probiotic strains, bacterial genome edition or gene expression analysis.

Our technical platforms combine **microbiology, molecular biology** and **cellular biology**.

What are your key products or services?

With our **Research Microbiology** division, we enhance **R&D and innovation projects** through expert consulting and tailored scientific support.

Our **Precision Microbiology** unit ensures the performance and compliance of **microbiological products** through reliable, validated, and customized methods.

Can you sum up your company in 3 words?

- Collaboration
- Microbiology
- Expertise
