

HIGHLIGHT

Who are you?

Integrated DNA Technologies has supported genomics labs for 35+ years with advanced oligo synthesis, modification, purification, and QC. From NGS to PCR and CRISPR, IDT drives science with quality, scale, and service. Learn more at www.IDT.com

What is your expertise?

Our team at Integrated DNA Technologies brings decades of expertise in oligo synthesis, NGS, PCR, CRISPR, and qPCR. With advanced manufacturing, rigorous QC, and dedicated support, we help researchers accelerate breakthroughs in genomics and molecular biology worldwide.

What are your key products or services?

At IDT, we offers custom oligonucleotides, NGS solutions, CRISPR genome editing tools, qPCR assays, and synthetic genes. Our advanced synthesis, modification, and QC services support breakthrough research in genomics and molecular biology.

Can you sum up your company in 3 words?

- Customization
- Innovation
- Discovery
