

HIGHLIGHT

Who are you?

Adelis is a French company specializing in **capillary electrophoresis instruments**. Our solutions serve the biotherapy market, with DNA/RNA kits covering fragment sizes from 100 bp to 150 000 bp. Our technology offers unmatched sensitivity down to fg/ μ l, with no DNA extraction required

What is your expertise?

Adelis Technologies are experts in **capillary electrophoresis** and **fluorescence detection**.

Adelis develops innovative methods and kits to support routine lab analysis.

We also offer **cell free DNA** (cfDNA) analysis as a service for oncology, and partner with instrument makers to enhance their product range.

What are your key products or services?

Our BIABooster is a **4-channel capillary electrophoresis** system boosting productivity for nucleic acids, proteins, glycoproteins and sugars.
Adelis provides the ZETALIF **fluorescence detector** for Capillary Electrophoresis (Agilent 7100) and micro/nanoLC.

Can you sum up your company in 3 words?

- Expertise
- High Quality products
- Long History

THE BIABooster:

cfDNA/RNA fragment analysis platform
