

HIGHLIGHT

ARDENA

Navigating you through
drug development

Who are you?

Ardena provides **comprehensive bioanalytical services** supporting drug development from discovery through clinical trials. Our scientists deliver phase-appropriate, regulatory-ready data for both small and large molecules, enabling the advancement of precision medicines.

What is your expertise?

Our expertise covers LC-MS/MS, ligand binding assays, flow cytometry, and qPCR. We support **small molecules, biologics, oligonucleotides, and cell and gene therapies**, including nanomedicines with mRNA or antisense oligos, as well as biomarker analysis for CNS and inflammatory targets.

What are your key services?

We offer method development and validation, sample analysis with flexible 3–10-day reporting, and regulatory-ready documentation. Our **flexible and responsive** approach ensures reliable results with short lead times and the scientific depth your program demands.

Can you sum up your company in 3 words?

- 
- Data-driven
 - Reliable
 - Regulatory-ready
