

HIGHLIGHT

eurofins

BioPharma
Product Testing

Who are you?

Eurofins BioPharma Product Testing France provides a comprehensive set of quality control, analytical development, and environmental monitoring services for pharmaceutical and biopharmaceutical production.

What is your expertise?

“Eurofins BPT France offers a wide range of analytical services (physicochemical & microbiological QC, stability studies, etc...). Its extensive experience enables it to tailor its services to its clients' requirements and support product development from the early stages to the market launch.

Ours teams are made up of scientists driven by the same determination to create a safer and healthier world.

What are your key products or services?

Thanks to its biologics dedicated campus near Lyon, Eurofins Biopharma Product Testing offers the full suite of services for quality control and analytical development of biotherapeutics products.

Can you sum up your company in 3 words?

- Expertise
- Customised solutions
- Innovation & research
