

HIGHLIGHT

BRIDGING SCIENCE AND MANUFACTURING

Who are you?

Leanbio is a cutting-edge CDMO specializing in bioconjugation and complex biologics, including recombinant proteins, antibodies, and mRNA.

What is your expertise?

With both microbial and mammalian production platforms, Leanbio delivers seamless, end-to-end biopharmaceutical development and GMP manufacturing services.

The company provides tailored cell line and process development solutions, supporting programs from standard monoclonal antibodies to complex and novel biologics.

What are your key products or services?

We offer expertise in bioconjugation and ADCs (conventional and site-specific), including cytotoxics up to OEB5. Our end-to-end CDMO support spans from process development to GMP production, with a flexible, collaborative model for innovative pipelines.

Can you sum up your company in 3 words?

- Bioconjugation
- Partnership
- GMP Manufacturing
