

# HIGHLIGHT

# GENSENSOR

# Who are you?

For five years, **GenSensor** has been on a mission to help bioproducers better understand and control what happens inside their fermenters and bioreactors, through cutting-edge biomarker monitoring

**GenSampler®** is the next step in that journey: a fully automated sampling system that seamlessly integrates aseptic sampling and sample preparation, unlocking the full potential of advanced analytics

# What is your expertise?

At GenSensor, we unite bioprocess scientists, data engineers, and robotics experts around one shared conviction: better monitoring means better products

Our multidisciplinary team empowers biotech, biopharma, CDMO, cosmetic, and API producers to manufacture with greater confidence and control

# What are your key products or services?

**GenSampler®** - 24/7 fully automated fermenter and bioreactor sampler, up to 24 vessels, plug and play and compatible with all kind of vessels

**AI-driven biomarker analysis** - move beyond standard physical chemical CPP to more informative data: decipher your cell dynamics to unlock your bioprocess

# Can you sum up your company in **3 words?**

- Bioprocess mastering
- Bioreactor sampling
- Biomarker intelligence
